

Letter of recommendation – Håkan Levin Henriksson

This is to certify that Håkan Levin Henriksson worked as a tester withing the quality assurance department of *Pieces Interactive* on the development of *Fret Nice*, during a period of 2 months (1st of October – 1st of December).

Håkan had many different responsibilities while working for us, some of which included:

- Testing against *internal specifications* (features and gameplay).
- Testing against *external specifications* (TRC:s/TCR:s – certification requirements).
- Giving feedback on level design and alternate control-schemes among other things.

Håkan has also worked closely with both hardware and software used in certification, giving him a unique and valuable insight in the demands that a game must adhere to before it may be released on the market. Juding by his performance I would definitely say that Håkan is hard-working, reliable and driven. Apart from being 100% professional Håkan is also very fun to work with, an aspect I believe shouldn't be underestimated in any industry.

I would also like to point out that Håkan worked full-time, without any economic compensation while also having to focus on schoolwork. He has shown a willingness to work long hours and on weekends and has reacted to requests from management without the slightest complaint. I am extremely impressed with his performance, especially given the exterior circumstances.

I don't think I'm exaggerating when i say that Håkan has been absolutely intrumental in ensuring that Fret Nice passes certification. His professional attitude and eagerness to learn has been a tremendous asset to Pieces Interactive. Håkan has shown that he is not afraid of learning new things and that when he undertakes an unfamiliar task; he does so with full commitment. It has been an absolute joy to work with him and I wouldn't hesitate to recommend him for further employment.

Jonas Nilsson

QA Manager – Pieces Interactive
